SUMMARY

Electronics and Communication Engineering fresher with skills in Python and Oracle SQL.
Knowledge of OOP, SQL queries, database operations, and hands-on IoT project experience.
Eager to contribute to software development and apply technical skills to real-world challenges.

TECHNICAL SKILLS

Programming: Python, C, Embedded C
Tools: Arduino IDE, Keil µVision
Microcontrollers: 8051, Arduino
Concepts: IoT, Wireless Power Transfer, Automation Systems

HTML

- Strong understanding of HTML fundamentals, including HTML5, semantic elements, headings, paragraphs, lists, tables, hyperlinks, and multimedia elements for creating well-structured web pages.
- Proficient in HTML forms, input types, form controls, labels, buttons, and form validation attributes for collecting user information efficiently.
- Experienced in using HTML elements and attributes to structure web content, organize page layouts, and improve accessibility.
- Solid understanding of webpage structure, hyperlinks, images, audio, video, and integration of CSS and JavaScript into HTML documents.

CSS

- Strong understanding of CSS fundamentals, including selectors, colors, backgrounds, fonts, borders, margins, and padding for styling web pages.
- Proficient in the CSS box model, display properties, positioning, Flexbox, and Grid for creating organized and responsive layouts.
- Experienced in applying pseudo-classes, pseudo-elements, transitions, transformations, and animations to enhance user interface design.
- Solid understanding of responsive web design using media queries, relative units, and layout techniques for creating mobile-friendly web pages.

JavaScript

- Strong understanding of JavaScript fundamentals, including variables, data types, operators, control statements, loops, and input/output handling for developing interactive web applications.
- Proficient in functions, arrays, objects, strings, arrow functions, callbacks, and ES6 features for writing clean, reusable, and maintainable code.
- Solid understanding of DOM manipulation and event handling for dynamically updating webpage content and responding to user interactions.
- Hands-on experience with form validation, error handling, and asynchronous JavaScript concepts, including callbacks, promises, and async/await, for building dynamic web applications.

EDUCATION

Vemana Institute of Technology

B.E. in Electronics and Communication Engineering (Present) | CGPA: 6.5/10

PROJECTS

Temperature-Based Fan Control System using 8051 Microcontroller

Designed a system that automatically controls fan speed based on room temperature readings from a sensor.
Technologies: Embedded C, 8051 Microcontroller, Keil IDE

Wireless Power Transfer System

Developed a wireless charging prototype using inductive coupling for contactless energy transfer.
Technologies: Embedded C, Power Electronics

CERTIFICATIONS

- Internet of Things Foundation Certification - OnWingspan (May 2025)
- Introduction to Artificial Intelligence - Simplilearn (Nov 2024)
- Documentation Using LaTeX Workshop (Jun 2024)
- Strategic Training and Development full course - Mindluster (Nov 2024)
- NCC 'B' & 'C' Certificates (Jul 2023 - 2024)

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
